Storage Conditions and Shelf Life Declaration for Nayara Polypropylene

Shelf life of Polypropylene is very much dependent on storage conditions, handling of the product and the type of packaging the product is stored in. These conditions may vary from user to user and also as per geographical location of the storage. Hence shelf life of Polypropylene can not be defined accurately.

However, Shelf life of Nayara Polypropylene product can be taken as 12 months from the date of manufacturing, provided it is stored in its original packaging and in a well-ventilated, covered, dry place away from heat and sun rays, at a storage temperature of below 50° C. and is well protected from any kind of radiation including UV, hot air or any devices or substances emitting heat, is not in direct contact with chemicals and reagents or fumes of the same, smoke, ozone gas, any kind of dust etc.

The declaration given above is valid till the product is not opened and is stored in its original packaging, where the packaging is not damaged and the product inside is not exposed to external environment.

Disclaimer: The declaration given above is only for guidance purpose of the intended recipient and is not to be used for any litigation purpose.
