

# Company Factsheet

## Our Company

Nayara Energy is a new-age downstream company of international scale with a unique mix of young & experienced minds and a robust foundation of best-in-class infrastructure and processes.

In August 2017, Rosneft, a Russian integrated energy company along with an investment consortium comprising global commodity trading firm, Trafigura and Russia's investment fund, United Capital Partners bought a stake in Essar Oil for \$12.9 billion.

## Our Offerings

We own India's second largest single site, state-of-the-art refinery. It is one of the most modern and complex refineries in the world having businesses across the hydrocarbon value chain, from refining to retail. We are geared up to the vision of delivering crude to chemicals.

Our Vadinar Refinery benefits from a fully integrated infrastructure developed around the refinery site including power plant, port, pipelines and tankages with multi-product dispatch facilities through rail, road and sea.

## Our CSR Initiatives

Driving inclusive growth and delivering value for the stakeholders is at the core of our beliefs. Through various sustainable development projects in the areas of health & nutrition, education and environment, Nayara Energy continues to play a pivotal role in improving quality of life of the communities.

Livelihood

## Our Safety Mission

We are constantly striving towards building a sustainable Healthy, Safe, Environment-friendly and Quality standards (HSEQ) in the world.

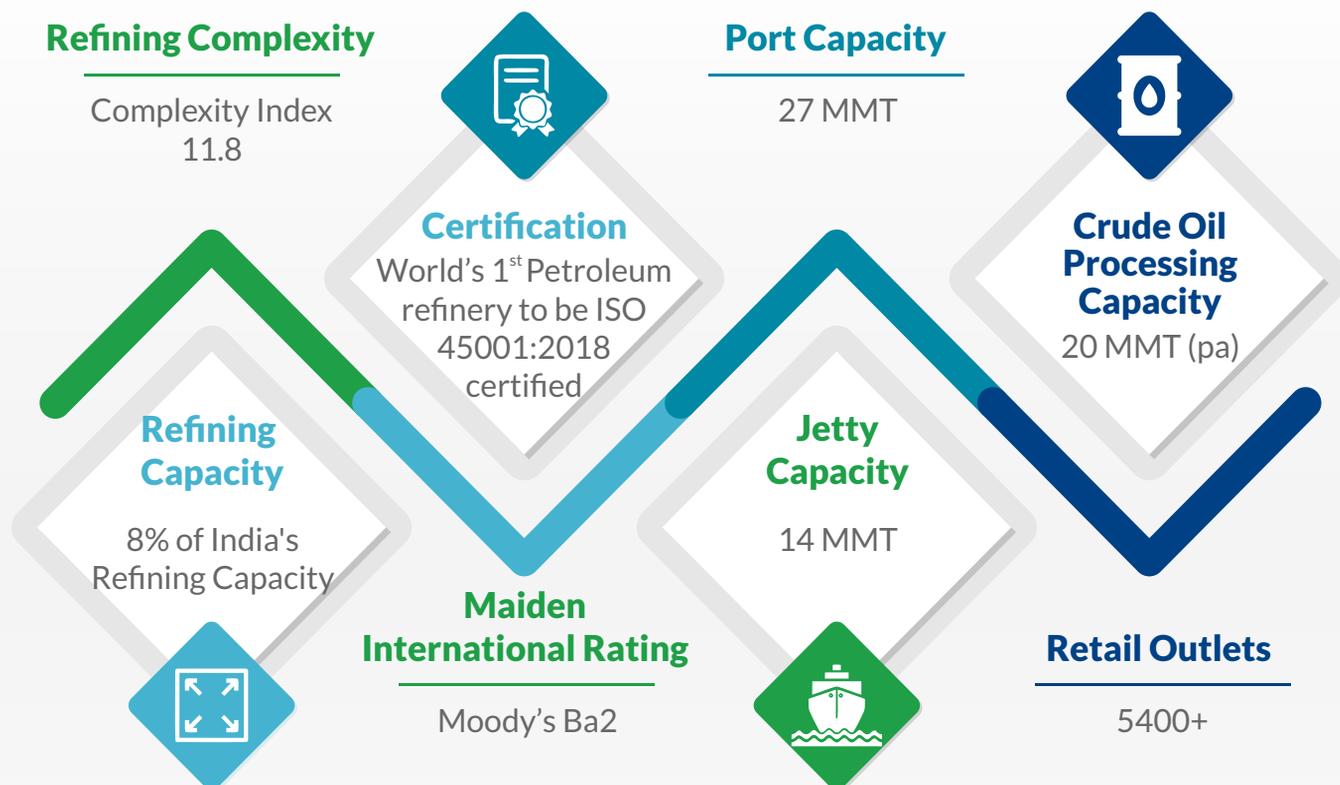

## Our Values:

Our EXCEL values propel us to shape a better tomorrow, today. Keeping curiosity, innovation and energy at the heart of everything that we do, we view every challenge as a new possibility, seeking a new solution that will redefine the outlook.

## Our Performance Indicators:

## Our Core Focus Areas

### Refinery

Operating one of the India's most modern and complex refineries which is supported by end-to-end infrastructure including SBM (Single Buoy Mooring), crude oil tanker facility, water intake facilities, a captive power plant, product jetty and dispatch facilities (by rail, road and sea).

### Trading

Responsible for maximizing GRM by timing the market movements for procuring value additive crude & other feedstock. Exporting surplus products, managing commodity risk, thus ensuring uninterrupted supply of feedstock. Optimising our crude slate to produce high value product mix via efficient utilisation of refinery units.

### Marketing

With over 59 supply locations across the country, the retail marketing and the institutional business manages supply and distribution of our products in the domestic as well as international markets.

### Asset Development

Developing and implementing major projects in line with our corporate growth strategy. The team evaluates specific opportunities in refining and petrochemical areas including development of partnerships to diversify our portfolio of products.
